YoYo Jewelry Project

Courtesy of Springs Creative

YoYo Jewelry Supplies:

- 1 Springs Creative YoYo Kit
- 2 yd. of ribbon
- 2 post earring backs
- Buttons & Beads for embellishment (optional)
- Hand sewing needle
- Thread
- Ruler
- Pen
- Iron & Iron Board

YoYo Cuff Bracelet Directions:

1. Cut out the number of YoYos you want to use for your bracelet.
2. Determine what size you want each YoYo to be. The example in the photo to the right uses 1 2" YoYo (size of the YoYos in kit), 1 1.5" YoYo, and 1 1" YoYo.
3. If using smaller YoYos, the easiest way to decide the size of the circle needed is to take the finished measurement, double it and add 0.5" for seam allowance. For example, to use a 1.5" YoYo, it would be:
 $1.5" \text{ YoYo} \times 2 = 3" \text{ circle} + 0.5" \text{ seam allowance} = 3.5" \text{ circle}$
4. The YoYos in the kit are 4.5" circles. Using a pen and ruler, measure the circles needed and cut it out.
5. Follow the instructions provided in the kit to make the YoYos.
6. Great embellishments to use are buttons or beads.
7. Decide the arrangement of YoYos and pin them in place slightly overlapping each other. Using a needle and thread, stitch the overlapping edges down.
8. Cut a ribbon the desired length. Attach the YoYos to the middle of the ribbon with either a hot glue gun or needle and thread. Enjoy!

YoYo Necklace Directions:

1. Follow the directions above for the YoYo bracelet. For the necklace in the photo, 2 2" YoYos, 2 1.5" YoYos, and 2 1" YoYos were used.

YoYo Earrings Directions:

1. Follow directions 1-6 for the bracelet. The photo example uses 2 1" YoYos.
2. Use a hot glue gun to attach the YoYos to the earring backs.
3. Enjoy your matching set of YoYo jewelry!
